orjollet julien

Software developer, focused on Javascript, I have developed a Frontend profile through continuous work, validation of projects, training & certifications allowing me a technical understanding of the language.

Passionate about JAM (Javascript API's Markup) Stack Technologies, I made the decision to specialize on Reactjs.org, learning **OOP & Functional Programming paradigms, states management, data structure and design patterns** ... I supported this approach using React, Redux, Typescript & TDD.

The software craftmanship allowed me to find a model on which to rest, thus allowing me to understand **how to approach "legacy code",** to set up test suites, to think in terms of domains and entities as well. than working on making **my code more intentional.**

software developer on web & mobile applications

Immediate availability - "Studying web development since 2018, validating complete courses, bootcamp and specifications around the web professions. I am looking for a Web, Fullstack Javascript or Frontend React Developer position.
I live in **Givors, south of Lyon (France)**. I'm ready to listen about opportunities in others country."

skills

functional :
Priority management
Production of documentation
Study of technical and architectural needs

method :
Agile "Scrum" methodology
Using Git Bash & Github as version control system

technical :

javascript
ES6, data structure, OOP, FP, states management, design patterns
Node, express, axios, lodash, esLint, typescript
React, context API, redux, greensock, styled components
NPM, webpack, babel, REST API

web
HTML5, CSS3, javascript, databases, SEO, accessibility
SASS, PostCSS, SMACSS, CSS frameworks, B.E.M, UI/UX

design
Design systems, figma, atomic & fluid design
Web responsive, mobile first

testing
Jest, enzyme, react testing library, T.D.D, esLint, typescript

data base
SQL databases, UML diagrams, firebase, mongo

management
Git bash, github, trello, lucidchart, notion

others
PHP7, bootstrap, tailwind, wordpress, netlify, heroku, postman

soft-skills

Communication, empathy, confidence
Problem solving, methodology, creativity, autonomy
Adaptability, collaboration, teamwork

languages

French (native language)
English (advanced)
Portuguese (advanced)

studies

React Professional
JUNE / AUGUST 2021

Coding Dojo, Udemy
Freecodecamp
Frontendmasters

React - Typescript & Testing workshop
REACT - JSX - STATES & PROPS - CONTEXT API - REDUX - ARCH PATTERN
TYPESCRIPT - TDD - JEST - ENZYME - TESTING LIBRARY - ESLINT - VS CODE

Technical study of React / Redux classics, contextualization of TDD on micro applications, Typescript approach (OOP, React, algo), "Testing" specialization, study on "Clean code" practices in javascript for modern applications of large scale.

Specification Javascript
NOVEMBER 2020 / APRIL 2021

FontendMasters
Freecodecamp
ZTM Academy

Javascript workshop
TYPES & COERCION - EQUALITY - HOISTING - SCOPE - ASYNC - PROMISE - CALLBACKS - HTTP - JSON - API
DATA STRUCTURE - CLASS - MODULES - FUNCTIONAL PROGRAMMING / OOP - PURITY...

Theorical study & implementation of JavaScript fundamentals on key topics such as functions / objects, classes, types, asynchronous, closures, callbacks ...
Approach to OOP and Functional Programming paradigms, notions of "purity & immutability" or encapsulation.

Specification Reactjs
AUGUST / DECEMBER 2020

ZTM Academy
Udemy

React - Context API & Redux workshop
REACT HOOKS - ROUTING SPA - CONTEXT API - IMMER
REACT & REDUX - PERSISTENCE - STATE NORMALZATION -CONTROLLED COMPONENTS - SESSION
STORAGE - MONGO - EXPRESS - FIREBASE - STRIPE - STYLED COMPONENTS - TACHYONS

React / Redux specialization training on their key concepts & advanced features.
Realization of practice applications including two classic projects, blog / social network and e-commerce.
Implementation of several features according to the contexts and user cases.

Javascript Animations
OCTOBER / NOVEMBER 2020

IHT

Creative Web workshop
GREENSOCK - SCROLL MAGIC - BARBAJS - IMAGES LOADER - SMOOTH SCROLLBAR - SVG - DOM

Workshop mainly around the Greensock library and the approach of advanced animations through the practice and use of plugins, manipulation of the DOM, SVG, CSS3 on focused "Creative Web" applications and projects.

Development web & mobile
DECEMBER 2019 / JULY 2020

Freecodecamp
Udemy
3W Academy

Software applications, web & mobile
HTML5 - CSS3 - BOOTSTRAP - B.E.M - SMACSS - DESIGN
JAVASCRIPT - AJAX - WEBPACK - GIT - PHP - MYSQL - WORDPRESS

Introductory bootcamp and training in the web developer job principles & practices. Approach to a classic ecosystem. Achievements of projects combining best practices such as HTML5 semantics, SEO, Mobile First, an automated environment, the version management system, backend-side programming ...

personal experience

PERSONAL'S PROJECTS

Frontend Developer React / Redux
JULY 2021
techno

Jotto Application
Towards a more professional approach to my work, the goal has been to take control of TDD, test suites with Redux & the API context of React.
React, context API, Redux, Axios, Proptypes, Jest, Enzyme, Moxios

Frontend Developer React / Redux
DECEMBER 2020 / JANUARY 2021
techno

Crown e-commerce
This e-commerce project was followed as a case study and professional context for the state manager Redux on a larger scale. Added concepts such as CSS in javascript with Styled Components or the connection to Firebase for example, were used.
React & Redux, states management, Firebase, Styled Components...

Software Developer Web & Mobile
OCTOBER / NOVEMBER 2020
techno

Bella Design website creative
Implementation of multiples web animations with javascript and css by manipulating libraries on a creative website project. DOM manipulation with GSAP's Timelines & scrollTriggers, managing transitions with Barbajs ...
HTML5 / CSS3, CSS advanced, javascript librairies (Greensock & Barbajs...)

Frontend Developer React
AUGUST / OCTOBER 2020
techno

Complex React Application
With a view to getting to grips with React's hooks within a larger-scale project, a social media project was followed as a case study and professional context ...
React concepts clés, context API, Mongo, Express, Bootstrap 4

Software Developer Web & Mobile
JANUARY 2020
techno

D.B.S.H template
Put into practice the first responsibilities of the web developer, including work around the design, HTML5 semantics, CSS management, accessibility, SEO, use of webpack & lodash, implementation of JavaScript Modules ported to classes, versioning with Git ...
HTML5 / CSS3, Webpack, Lodash, Javascript Modules
